### ***Election /Restriction***

7. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Group I, consisting of claims 21-32 drawn to a composition, classified under Class 435, subclass 262, for example.
  - Group II, consisting of claims 33-42 drawn to treat chemical intoxication in a subject, classified under Class 424, subclass 406, for example.
8. The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I-II are related to each other as product and use thereof. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product [MPEP § 806.05(h)]. In the instant case, the detoxification method to treat intoxication in a subject can be accomplished with a variety of pharmaceuticals/products available in the market place. Alternatively the product may be applicable for detoxifying any material (e.g., Industrial wastewater/ contaminated site).

The inventions discussed above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches. The search for each one of the above inventions is not coextensive particularly with regard to the literature search. Further, a reference that would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification (i.e., class and subclass), and their recognized diverse subject matter, restriction for examination purposes as indicated is proper.

9. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
